

Colored Breed Sires

December 2025

GENEX[™]
FOR GENERATIONS

Make Every Day Girls' Day with GenChoice™ Sexed Semen

GENEX GenChoice™ semen delivers the heifer calves you need, along with the fertility and performance you expect!

- › **Backed by data:** GENEX offers PregCheck+™ fertility rankings for sexed semen. It's real results based on real data.
- › **Trusted fertility:** Long-term fertility leadership and stringent quality control means more pregnancies and more progress.
- › **Strategic advantage:** With heifer shortages and rising replacement costs, it pays to plan smart.

How do PregCheck+™ fertility rankings work?

PregCheck+™ fertility rankings are based on actual breeding and pregnancy data, providing a data-backed evaluation of a bull's sexed semen conception rate. The rankings are set to a 100-base system. Each point above or below the average reflects an increase or decrease in fertility.

Your future herd starts here. Contact your local GENEX representative for GenChoice™ semen and leverage PregCheck+™ rankings for proven fertility!

Turn every insight into a
game-winning move.

The GENEX HerdMonitor™ Cow Monitoring System gives you real-time health and heat insights so you can make the right moves at the right time. And just like any championship team, you've got expert coaches – your GENEX team, you've got expert coaches – your GENEX team – to help you turn data into victories.

Ready to build your winning strategy?

Contact your local GENEX representative today or visit www.genex.coop/herdmonitor.

Less Drama for Mama

with RumiLife® CAL24™
nutritional supplement

Calving doesn't have to mean stress, setbacks or scrambling to get your fresh cows back on track. When calcium demands surge, RumiLife® CAL24™ nutritional supplement meets them head-on. Designed for simplicity and optimal fresh cow health, this on-farm essential delivers fast-acting, long-lasting calcium support in a two-bolus system that fits seamlessly into your routine.

Without RumiLife® CAL24™

- › Down cows
- › Delayed recovery
- › More health events
- › Increased costs, lower returns
- › **Calving chaos**

With RumiLife® CAL24™

- › Smooth transitions with full calcium coverage
- › Increased performance & productivity
- › Fewer health events
- › Peace of mind
- › **Less drama for mama**

RumiLife® CAL24™ nutritional supplement is calcium that works smarter and longer, targeted to support the cow when she's most vulnerable. It delivers complete calcium coverage and supports cow health from the moment she freshens.

Two boluses. One smooth start to lactation.

GENEX™

Terminology

ICC™ index

ICC™ for Holsteins is the combination of three sub-indexes: 53% Production Efficiency (PREF), 34% Sustainability (SUST) and 13% Fertility (FERT).

ICC™ for Jerseys and Mixed Breed sires is the combination of three sub-indexes: 46% Cheese Maximizer (ChMAX), 36% Sustainability (SUST) and 18% Fertility (FERT).

Lifetime Net Merit \$ (NM\$)

Calculated by the Council on Dairy Cattle Breeding (CDCB) and measures net profit over the lifetime of a bull's average daughter.

Lifetime Cheese Merit \$ (CM\$)

Designed for producers who sell milk in a cheese market and value high protein premiums. Calculated by the CDCB and combines the same traits as the NM\$ index.

Reliability (Rel)

A measure of the amount of information in a trait. Reliability is expressed as a percentage, ranging from 1 to 99. The closer the reliability is to 99, the more reliable the proof.

PTA Milk

Predicted Transmitting Ability (PTA) for milk production in pounds, reflecting the expected milk production of future mature daughters.

PTA Protein Pounds

PTA for protein production in pounds, reflecting the expected production of future mature daughters.

PTA Protein Percent

Indicates the genetic variance of a bull's PTA for transmitting protein as being positive or negative.

PTA Fat Pounds

PTA for butterfat in pounds, reflecting the expected butterfat production of future mature daughters.

PTA Fat Percent

Indicates the genetic variance of a bull's PTA for transmitting fat as being positive or negative.

Combined Fat and Protein (CFP)

The sum of PTA Fat pounds and PTA Protein pounds.

RobotX™

GENEX composite value focused on genetics for easy milking. A value of 100 is considered average with higher numbers being more desirable.

PTA Productive Life

A measure of the expected longevity of a bull's average daughters, measured in months.

PTA Livability (LIV)

Predicts cow's transmitting ability to remain alive while in the milking herd.

PTA Heifer Livability (HLIV)

The expected livability percentage of a bull's female offspring from 2 days after birth up to 18 months of age in a herd with average management conditions. Larger, positive values are more favorable.

PTA Somatic Cell Score (SCS)

The PTA for SCS is used to improve mastitis resistance. Bulls with lower SCS values are expected to have daughters with better mastitis resistance.

Daughter Pregnancy Rate (DPR)

Percentage of nonpregnant cows that become pregnant during each 21-day period. A DPR of 1.0 implies daughters from this bull are 1.0% more likely to become pregnant during that estrous cycle than a bull with an evaluation at zero.

Cow Conception Rate (CCR)

Lactating cow's ability to conceive based on the percentage of cows inseminated that become pregnant. If a bull's CCR is 1.0, his daughters would be 1% more likely to become pregnant during that lactation than a bull with an evaluation of zero.

Heifer Conception Rate (HCR)

Percentage of inseminated virgin heifers that become pregnant. A bull with an evaluation of 1.0 would have daughters that as heifers would be 1% more likely to become pregnant. Services are only included if the heifer is at least 12 months old and less than 2.2 years.

PTA Type (PTAT)

An estimate of the genetic superiority for conformation that a bull will transmit to its offspring.

Jersey Performance Index™ (JPI™ or URPI)

A breed index calculated by the American Jersey Cattle Association (AJCA).

Jersey Udder Index™ (JUI™ or URUI)

An index based on ability for udder improvement, calculated by the AJCA.

Sire Calving Ease

Percentage of Estimated Difficult Births in Heifers (EDBH) when they calve for the first time.

Daughter Calving Ease

Tendency of daughters of a particular sire to have more (or fewer) problems at calving than an average cow.

Early First Calving (EFC)

Defined as age in days at first calving. Animals expected to transmit genetics that decrease the age at first calving have a positive EFC value, because calving younger is seen as more beneficial.

PregCheck™ Fertility Rankings

PregCheck™ rankings are a GENEX evaluation of an individual sire's frozen semen conception rate and are based on actual breeding and pregnancy data. The ranking is set to a base of 100, with numbers 100 or above being more favorable.

PregCheck+™ Fertility Rankings

PregCheck+™ rankings are a GENEX evaluation of the conception ability of a bull's GenChoice™ sexed semen. The ranking is set to a base of 100, with numbers 100 or above being more favorable.

Sire Fertility (SCR)

Sire Conception Rate or SCR is the difference of the conception rate of a sire expressed as a percent comparison. SCR is based on conception rate and includes data on multiple services per lactation (up to 7). A SCR of +1.2 means the bull is 1.2% above averages.

Beta-Casein

A major casein protein making up 30% of total milk protein. Variations include A1A1, A1A2, A2A2.

Kappa-Casein (cheese production)

Variants A, B and E are associated with milk protein and quality. Variant combinations are related to the processing of cheese.

Linear Type Traits

Genetic evaluations for the linear type traits are expressed as Standard Transmitting Abilities (STAs).

Genetic Base

The genetic base for the evaluations represents the average of cows born in 2020.

For additional genetic information, visit catalog.genex.coop/dairy or download the GENEX Dairy Bull Search App.

The genetic evaluations contained within this report, unless otherwise noted, are provided by the Council on Dairy Cattle Breeding as the steward of the National Cooperator Database. The National Cooperator Database houses producer-owned yield, management, ancestry, type, and genotype data for the use in genetic evaluations and independent research. Data included in the National Cooperator Database is submitted through certified organizations for data quality and integrity. As such, individual traits – along with Lifetime Net Merit \$, Cheese Merit \$, Fluid Merit \$, and Grazing Merit \$ – are Powered by CDCB, unless otherwise noted such as breed association type traits.

For more information about evaluations Powered by CDCB and the industry collaboration that fuels them, visit www.uscdcb.com/cdcb-marks

What Will Your Herd's Genetic Progress Report Reveal?

The GENEX DairySuite™ precision genetics program gives you a clear, visual snapshot of what's happening inside your herd's genetics program. The GENEX DairySuite™ genetic audit reveals if your herd is trending in the direction you intend – or if bull choices and current pregnancies tell a different story.

Performed by your GENEX representative, the DairySuite™ genetic audit highlights:

- › Strengths, weaknesses and hidden genetic trends
- › Whether your bull choices match your goals
- › Which traits are improving and which need attention
- › How your herd compares to industry standards

**Don't settle for average genetic progress.
Know where you stand – and how to get ahead.**

Ask your GENEX representative for a DairySuite™ genetic audit today.
